COMMERCIAL COVER SOLUTIONS

Multi-Link Panel

Rapid Roof Glazing for Factory Roofs

The multi-benefit fast fit system

Representing a breakthrough in pitched roof glazing, the Multi-Link Panel modular roof glazing system outperforms more traditional systems in terms of cost, performance and appearance.

Whether it's in a food factory or warehouse, swimming pool or school, new build or refurbishment, the patented Multi-Link Panel with its innovative fix and link system provides one of the most cost effective long term solutions for roof glazing.

““ The multi-Link Panel is a pre-assembled glazing panel, manufactured to size for each individual project. ””

One of the major benefits of the multi-Link Panel relates to the speed of installation. This is achieved by the pre-assembled nature of the panel, combined with the unique fix and link design of the bar system. Installation time compared with traditional glazing systems can be cut by two thirds, saving labour costs and perhaps more importantly, significantly reducing any necessary factory/ premises shutdown time when work is carried on overhead.

““ The system that outperforms in terms of cost, quality and appearance...
...and is simply the quickest way to install a quality glazed roof. ””

Multi-Link-Panels NF can be fitted where the glazing needs to conform to the HSG33 recommendation for Non-Fragile roofing.

Schools, hospitals & offices

Canopies for the outside environment

Canopies come into their own at schools, hospitals and offices, either taking the classroom outside or providing patients and workers with adequate cover.

- Lean-to systems
- Between buildings construction
- Stand alone structures
- Cantilever systems
- Curved shelters
- Walkways
- Aluminium/steel combination
- Polycarbonate sheeting
- Range of colour options
- Design and build

“ Our new canopy system allows us to move children from classroom to classroom under cover as well as letting the children get some valuable fresh air and play time. ”

Design Flexibility for the Domestic, Commercial or School Environment

COVERING IRELAND

Multicover is a specialist builder of low maintenance cover solutions for the domestic and commercial market. We can manufacture and install a tailor-made cover, from a single car carport to a school walkway. Installations throughout Ireland include private dwellings, councils, schools and hospitals. We can offer designs, advice and full installation, plus our products offer cost effective solutions, where specifications and designs can be adapted to fit most sites.

- Schools - protecting children from harmful UV rays and rain
- Factories and Offices - providing sheltered 'smoking' areas
- Hospitals - linking buildings and covering ambulance bays & outside seating
- Pubs and Restaurants - shading tables and chairs from the sun
- Social and Sports Clubs - creating alfresco entertaining areas
